

You can take an active role in increasing your safety or the safety of those you care about. While there's no way to eliminate the chance that something may happen, there are strategies that may reduce your risk or give you the confidence to step in to prevent a sexual assault.

## C.A.R.E

C - Create a Distraction

A - Ask Directly

R - Refer to an authority

E - Enlist others to help

---

## SURVIVE

- Scream and make a scene. Be rude. Make noise to discourage your attacker from following.
- Alert those around you if you are threatened.
- If you become a victim of a crime, you should call the police.
- The sooner you tell, the greater the chances the rapist will be caught. But if you are uncomfortable about calling the police, contact a rape crisis center.

REDUCE THE RISK  
OF  
SEXUAL ASSAULT

## Avoid Dangerous Situations

---

- Don't let alcohol or other drugs cloud your judgment. Most law enforcement calls on sexual assaults occur at parties involving drugs and alcohol.
- Trust your instincts - if a situation or place makes you feel uncomfortable or uneasy, leave.
- Be aware of your surroundings. Knowing where you are and who is around you may help you to find a way to get out of a bad situation.
- Try to avoid isolated areas or being alone. It is more difficult to get help if no one is around.
- Walk with purpose. Even if you don't know where you are going, act like you do.

## Outdoors

---

- Avoid walking or jogging alone, especially at night. Stay in well-traveled, well-lit areas.
- Wear clothes and shoes that give you freedom of movement.
- Be careful if anyone in a car asks you for directions; if you answer, keep your distance from the car.
- Have your key ready before you reach the door at home, car, or office.
- If you think you're being followed, change direction and head for open stores, restaurants, theaters, or a house with its lights on.

## Home

---

- Make sure all doors (don't forget sliding glass doors) and windows have sturdy, well-installed locks, and use them. Install a wide-angle peephole in the door. Keep entrances well-lit.
- Never open your door to strangers. Offer to make an emergency call while someone waits outside. Check the identification of sales or service people before letting them in. Don't be embarrassed to phone for verification.
- Be wary of isolated spots - apartment laundry rooms, underground garages, parking lots, offices after business hours. Walk with a friend, co-worker, or security guard, particularly at night.
- Know your neighbors so you have someone to call or go to if you're uncomfortable or frightened.
- If you come home and see a door or window open or broken, don't go in. Call the police from a cell phone, public phone or a neighbor's phone.

## Your Car

---

- Look around and under your car and in the back seat before you get in.
- If your car breaks down, lift the hood, lock the doors, and turn on your flashers. Call police on a cell phone, or use a Call Police banner or flares.
- If someone stops, roll the window down slightly and ask the person to call the police or a tow service.
- Don't hitchhike. Plus, don't ever pick up a hitchhiker.

## Safety Planning

---

- Make sure your cell phone is with you and charged and that you have money.
- Don't leave your drink unattended. If you leave your drink alone, get a new one. Don't accept drinks from people you don't know or trust.
- Have a code word with friends or family so that if you don't feel comfortable, you can call them and communicate your discomfort without the person you are with knowing. Your friends or family can then come to get you or make up an excuse for you to leave.
- Be conscious of exits or other escape routes.
- Think about options for transportation (cab, car, bus, train, etc.).
- Avoid putting music headphones in both ears so that you can be more aware of your surroundings, especially if you are walking alone.
